Fixing with nails

Gutta nails
2.8 x 70 mm, galvanized
with sealing washer
black or red

Drill bit for plastic
HSS, infinitely variable
from 4 up to 14 mm

Fixing with screws (alternative)

Schrauben guttanit+
4,5 x 45 mm
with sealing washer

Spacer Sinus
76/18

Molded parts for both fixing types

Ridge caps
black or red
Length: 1.05 m
Net length: 0.95 m

Gable brackets
black or red
Length: 1.05 m
Net length: 0.95 m

Product range

In addition to our **guttanit+** corrugated sheets, you will find many other products for construction, garden and hobby in our range:

- **Corrugated sheets** made of acrylic, polycarbonate, PET, PVC and polyester in various corrugations with matching installation accessories
- **Multiwall sheets** made of polycarbonate and acrylic with good insulating properties and suitable installation systems made of plastic or aluminum
- **Multiwall panels** made of PVC or PC with tongue and groove connection
- **Front door canopies** the perfect protection for your entrance area stable, lightweight and durable in a decorative design
- **Terrace roof kits** the complete do-it-yourself solution. For patios, balconies, carports and pergolas
- **Decorative sheets** made of polystyrene or acrylic, smooth or textured for various areas of application, indoors and outdoors
- **Dimpled membranes** with maximum pressure stability for high safety in foundation wall protection, cleanliness layer, etc.
- **Garden products** an extensive range of lawn grids, garden films, garden fleeces, cold frames, greenhouses etc.
- Please ask for our detailed information material!

Subject to color and size deviations etc. within the usual tolerances. Observe the local building regulations. Our recommendations do not release you from the obligation to check the product on your own responsibility. In case of doubt, please consult a specialist. All data and sketches according to manufacturer's specifications, subject to technical changes.

the eco-friendly
roofing sheets

made from 100% recycled material

Made
in
Germany

**For a better environment!**

Less plastic waste and reduced CO² emissions through recycling

**Easy and clean to use!**

Cuts can be made with a saw or even scissors. No soiling of the tool

**Extremely flexible and impact re-**

sis! Highly hail resistant and easy to install!

**Simple cut-outs or continuous roof-**

lights! guttanit+ is compatible with all standard transparent corrugated sheets.

**Quiet during rainfall!**

Hardly any noise compared to metal sheets

**Resilient and dimensionally stable!**

Very high static load-bearing capacity due to high material thickness and embossed honeycomb structure

**Made in Germany!**

Highest quality and short transportation routes

**Robust and very durable!**

Our guttanit+ corrugated sheets are guaranteed for 15 years.

guttanit+

Guttanit+ corrugated sheets made of 100% recycled plastic

guttanit+ recycled sheets are Gutta Werke's solution for sustainable and environmentally conscious construction. Made from 100% recycled plastic, they are highly resilient, durable, easy to work with - and can also be recycled later. Discover all the advantages now!

Sustainably produced in Germany

guttanit+ roof and wall sheets meet all the requirements of a sustainable product: thanks to their 100% recycled content, they are the perfect choice for ecologically committed do-it-yourselfers - with full performance and the highest quality. On the contrary, they are even easier and cleaner to use!

Less waste - more respect for the environment!

At the same time, guttanit+ helps you save valuable resources and reduce the amount of plastic waste. This protects our nature, the oceans and contributes to a sustainable economy!

Recycled and reusable again and again

By recycling the material, waste incineration is avoided and CO² emissions are reduced. After years and decades of use, the sheets can simply be returned to the production cycle. The result is a closed material cycle and a convincing ecological balance.

Sustainability made in Germany

Another decisive advantage is that production takes place entirely in Germany. This guarantees short transportation routes, high availability and even better ecological properties with consistently high quality.

Guttanit+ is your quality plus

In addition to the ecological balance, the quality is just as impressive: guttanit+ boards are highly durable, dimensionally stable, UV and weather resistant and long-lasting with a 15-year guarantee! You can always rely on Gutta quality!

An innovation that you will not hear

You will not hear one important advantage: guttanit+ sheets are so quiet that raindrops do not cause any annoying, loud noises on the roofing, as is the case with metal roofing, for example.

A clean affair in terms of processing too

guttanit+ sheets are in no way inferior to conventional corrugated bitumen sheets in terms of quality and durability - on the contrary. They are even easier and cleaner to process, without any odour and dirt impairments. The sheets are neat and easy to cut to size using a saw or box cutters and scissors for specific shaped cuts.

All-round sustainability and economy right down to the accessories

The guttanit+ sheets are available in the colors red-brown and black, in a size of 2000 x 900 mm with a 76/18 sinusoidal corrugation. The underside of the sheet has a honeycomb structure for additional stability. The top side has a light texture for an attractive appearance. An extensive range of accessories is available to complete the range. These include moldings such as ridge caps and gable brackets made from the same recycled material, as well as screws with washers.

**Maximum compatibility and easy to process**

Thanks to the 76/18 sinusoidal corrugation, guttanit+ is compatible with almost all common transparent corrugated sheets. This makes it easy to integrate continuous skylights into the roof surface, if required.

Technical data

Sheet size	2,000 x 900 mm (1.200 x 900 mm)
Surface area	1.80 m ²
Cover surface	1.60 m ²
Corrugation	Sinus 76 x 18 mm
Corrugations per sheet	12
Thickness	2.5 mm
Weight	2.4 kg/m ²
Colors	Black or brown-red
Texture	Underside honeycomb / top side C-structure
Guarantee	15 years / 10 years according to guarantee conditions
